The Aleppo Codex Sep 18 2021 Winner of the 2014 Sami Rohr Prize for Jewish Literature A thousand years ago, the most perfect copy of the Hebrew Bible was written. It was kept safe through one upheaval after another in the Middle East, and by the 1940s it was housed in a dark grotto in Aleppo, Syria, and had become known around the world as the Aleppo Codex. Journalist Matti Friedman's true-life detective story traces how this precious manuscript was smuggled from its hiding place in Syria into the newly founded state of Israel and how and why many of its most sacred and valuable pages went missing. It's a tale that involves grizzled secret agents, pious clergymen, shrewd antiquities collectors, and highly placed national figures who, as it turns out, would do anything to get their hands on an ancient, decaying book. What it reveals are uncomfortable truths about greed, state cover-ups, and the fascinating role of historical treasures in creating a national identity.

The Wicked and the Damned Jul 29 2022 A chilling mosaic novel by masters of their craft. On a misty cemetery world, three strangers are drawn together through mysterious circumstances. Each of them has a tale to tell of a narrow escape from death. Amid the toll of funerary bells and the creep and click of mortuary-servitors, the truth is confessed. But whose story can be trusted? Whose recollection is warped, even unto themselves? For these are strange stories of the uncanny, the irrational and the spine-chillingly frightening, where horrors abound and the dark depths of the human psyche is unearthed. A chilling portmanteau. I could feel the hairs on the back of my neck prickling. The perfect combination of horror and Warhammer 40,000.' Paul Kane - bestselling and award-winning author of Sherlock Holmes and the Servants of Hell and Before

Food Stabilisers, Thickeners and Gelling Agents Sep 26 2019 Stabilisers, thickeners and gelling agents are extracted from a variety of natural raw materials and incorporated into foods to give the structure, flow, stability and eating qualities desired by consumers. These additives include traditional materials such as starch, a thickener obtained from many land plants; gelatine, an animal by-product giving characteristic melt-in-the-mouth gels; and cellulose, the most abundant structuring polymer in land plants. Seed gums and other materials derived from sea plants extend the range of polymers. Recently-approved additives include the microbial polysaccharides of xanthan, gellan and pullulan. This book is a highly practical guide to the use of polymers in food technology to stabilise, thicken and gel foods, resulting in consistent, high quality products. The information is designed to be easy to read and assimilate. New students will find chapters presented in a standard format, enabling key points to be located quickly. Those with more experience will be able to compare and contrast different materials and gain a greater understanding of the interactions that take place during food production. This concise, modern review of hydrocolloid developments will be a valuable teaching resource and reference text for all academic and practical workers involved in hydrocolloids in particular, and food development and production in general.
