Satire and Dissent Oct 10 2020 In an age when Jon Stewart frequently tops lists of most-trusted newscasters, the films of Michael Moore become a dominant topic of political campaign analysis, and activists adopt ironic, fake personas to attract attention -- the satiric register has attained renewed and urgent prominence in political discourse. Amber Day focuses on the parodist news show, the satiric documentary, and ironic activism to examine the techniques of performance across media, highlighting their shared objective of bypassing standard media outlets and the highly choreographed nature of current political debate.

Human Rights Sep 01 2022 Human rights refers to the concept of human beings as having universal rights, or status, regardless of legal jurisdiction, and likewise other localising factors, such as ethnicity and nationality. For many, the concept of "human rights" is based in religious principles. However, because a formal concept of human rights has not been universally accepted, the term has some degree of variance between its use in different local jurisdictions -- difference in both meaningful substance as well as in protocols for and styles of application. Ultimately the most general meaning of the term is one which can only apply universally, and hence the term "human rights" is often itself an appeal to such transcended principles, without basing such on existing legal concepts. The term "humanism" refers to the developing doctrine of such universally applicable values, and it is on the basic concept that human beings have innate rights, that more specific local legal concepts are often based. Within

particular societies, "human rights" refers to standards of behaviour as accepted within their respective legal systems regarding 1) the well being of individuals, 2) the freedom and autonomy of individuals, and 3) the representation of the human interest in government. These rights commonly include the right to life, the right to an adequate standard of living, the prohibition of genocide, freedom from torture and other mistreatment, freedom of expression, freedom of movement, the right to self-determination, the right to education, and the right to participation in cultural and political life. These norms are based on the legal and political traditions of United Nations member states and are incorporated into international human rights instruments. This new book brings together the latest book literature centred on this crucial topic.

**Allies in Memory** Aug 27 2019 A fresh perspective on World War II commemoration that identifies the central place of war memory in post-1945 transatlantic relations.

*Communities of Sense* Apr 15 2021 *Communities of Sense* argues for a new understanding of the relation between politics and aesthetics in today's globalized and image-saturated world. Established and emerging scholars of art and culture draw on Jacques Rancière's theorization of democratic politics to suggest that aesthetics, traditionally defined as the "science of the sensible," is not a depoliticized discourse or theory of art, but instead part of a historically specific organization of social roles and communality. Rather than formulating aesthetics as the Other to politics, the contributors show that aesthetics and politics are mutually implicated in the construction of communities of visibility and sensation through which political orders emerge. The first of the collection's three sections explicitly examines the links between aesthetics and social and political experience. Here a new essay by Rancière posits art as a key site where disagreement can be staged in order to produce new communities of sense. In the second section, contributors investigate how sense was constructed in the past by the European avant-garde and how it is mobilized in today's global visual and political culture. Exploring the viability of various models of artistic and political critique in the context of globalization, the authors of the essays in the volume's final section suggest a shift from identity politics and preconstituted collectivities toward processes of identification and disidentification. Topics discussed in the volume vary from digital architecture to a makeshift museum in a Paris suburb, and from romantic art theory in the wake of Hegel to the history of the group-subject in political art and performance since 1968. An interview with Étienne Balibar rounds out the collection. Contributors. Emily Apter, Étienne Balibar, Carlos Basualdo, T. J. Demos, Rachel Haidu, Beth Hinderliter, David Joselit, William Kaizen, Ranjanna Khanna, Reinaldo Laddaga, Vered Maimon, Jaleh Mansoor, Reinhold Martin, Seth McCormick, Yates McKee, Alexander Potts, Jacques Rancière, Toni Ross

*Naming the System* Oct 22 2021 Examines contemporary trends in employment and unemployment, in hours of work, and in the nature of jobs and proposes strategic options for organized labor in the current political context.

**Transgender Psychoanalysis** Sep 28 2019 Drawing on the author's clinical work with gender-variant patients, *Transgender Psychoanalysis: A Lacanian Perspective on Sexual Difference* argues for a depathologizing of the transgender experience, while offering an original analysis of sexual difference. We are living in a "trans" moment that has become the next civil rights frontier. By unfixing our notions of gender, sex, and sexual identity, challenging normativity and essentialisms, trans modalities of embodiment can help reorient psychoanalytic practice. This book addresses sexual identity and sexuality by articulating new ideas on the complex relationship of the body to the psyche, the precariousness of gender, the instability of the male/female opposition, identity construction, uncertainties about sexual choice—in short, the conundrum of sexual difference. *Transgender Psychoanalysis* features explications of Lacanian psychoanalysis along with considerations on sex and gender in the form of clinical vignettes from Patricia Gherovici's practice as a psychoanalyst. The book engages with popular culture and psychoanalytic literature (including Jacques Lacan's treatments of two transgender patients), and implements close readings uncovering a new ethics of sexual difference. These explorations have important implications not just for clinicians in psychoanalysis and mental

health practitioners but also for transgender theorists and activists, transgender people, and professionals in the trans field. Transgender Psychoanalysis promises to enrich ongoing discourses on gender, sexuality, and identity.

*After the Wrath of God* Jul 27 2019 On a cold February morning in 1987, amidst freezing rain and driving winds, a group of protesters stood outside of the Unitarian Universalist Church in Amherst, Massachusetts. The target of their protest was the minister inside, who was handing out condoms to his congregation while delivering a sermon about AIDS, dramatizing the need for the church to confront the seemingly ever-expanding crisis. The minister's words and actions were met with a standing ovation from the overflowing audience, but he could not linger to enjoy their applause. Having received threats in advance of the service, he dashed out of the sanctuary immediately upon finishing his sermon. Such was the climate for religious AIDS activism in the 1980s. In *After the Wrath of God*, Anthony Petro vividly narrates the religious history of AIDS in America. Delving into the culture wars over sex, morality, and the future of the American nation, he demonstrates how religious leaders and AIDS activists have shaped debates over sexual morality and public health from the 1980s to the present day. While most attention to religion and AIDS foregrounds the role of the Religious Right, Petro takes a much broader view, encompassing the range of mainline Protestant, evangelical, and Catholic groups--alongside AIDS activist organizations--that shaped public discussions of AIDS prevention and care in the U.S. Petro analyzes how the AIDS crisis prompted American Christians across denominations and political persuasions to speak publicly about sexuality--especially homosexuality--and to foster a moral discourse on sex that spoke not only to personal concerns but to anxieties about the health of the nation. He reveals how the epidemic increased efforts to advance a moral agenda regarding the health benefits of abstinence and monogamy, a legacy glimpsed as much in the traction gained by abstinence education campaigns as in the more recent cultural purchase of gay marriage. The first book to detail the history of religion and the AIDS epidemic in the U.S., *After the Wrath of God* is essential reading for anyone concerned with the intersection of religion and public health.

**Community Projects as Social Activism** Apr 03 2020 *Community Projects as Social Activism: From Direct Action to Direct Services* by Benjamin Shepard is an engaging and accessible work that will get today's students excited about the very real prospect of achieving lasting, positive change within their communities. It outlines a distinct approach to community practice born out of the intersection among social movements, day-to-day organizing, and the lessons of five decades of community change practices. This invaluable resource is a must-have for anyone involved in community organization, community health, and community activism practice research and policy.

**Making Sense of Suicide Missions** May 05 2020 "Suicide attacks are a defining act of political violence and an extraordinary social phenomenon. This book investigates the organizers of suicide missions and the perpetrators alike"--Provided by publisher.

Psychology and the Conduct of Everyday Life Jun 05 2020 *Psychology and the Conduct of Everyday Life* moves psychological theory and research practice out of the laboratory and into the everyday world. Drawing on recent developments across the social and human sciences, it examines how people live as active subjects within the contexts of their everyday lives, using this as an analytical basis for understanding the dilemmas and contradictions people face in contemporary society. Early chapters gather the latest empirical research to explore the significance of context as a cross-disciplinary critical tool; they include a study of homeless M?ori men reaffirming their cultural identity via gardening, and a look at how the dilemmas faced by children in difficult situations can provide insights into social conflict at school. Later chapters examine the interplay between everyday life around the world and contemporary global phenomena such as the rise of the debt economy, the hegemony of the labor market, and the increased reliance on digital technology in educational settings. The book concludes with a consideration of how social psychology can deepen our understanding of how we conduct our lives, and offer possibilities for collective work on the resolution of social conflict.

Architecture and Movement Nov 30 2019 The experience of movement, of moving through buildings,

cities, landscapes and in everyday life, is the only involvement most individuals have with the built environment on a daily basis. User experience is so often neglected in architectural study and practice. Architecture and Movement tackles this complex subject for the first time, providing the wide range of perspectives needed to tackle this multi-disciplinary topic. Organised in four parts it: documents the architect's, planner's, or designer's approach, looking at how they have sought to deploy buildings as a promenade and how they have thought or written about it. concentrates on the individual's experience, and particularly on the primacy of walking, which engages other senses besides the visual. engages with society and social rituals, and how mutually we define the spaces through which we move, both by laying out routes and boundaries and by celebrating thresholds. analyses how we deal with promenades which are not experienced directly but via other mediums such as computer models, drawings, film and television. The wide selection of contributors include academics and practitioners and discuss cases from across the US, UK, Europe and Asia. By mingling such disparate voices in a carefully curated selection of chapters, the book enlarges the understanding of architects, architectural students, designers and planners, alerting them to the many and complex issues involved in the experience of movement.

The Cultural Imaginary of Terrorism in Public Discourse, Literature, and Film Mar 03 2020 This study investigates the overlaps between political discourse and literary and cinematic fiction, arguing that both are informed by, and contribute to, the cultural imaginary of terrorism. Whenever mass-mediated acts of terrorism occur, they tend to trigger a proliferation of threat scenarios not only in the realm of literature and film but also in the statements of policymakers, security experts, and journalists. In the process, the discursive boundary between the factual and the speculative can become difficult to discern. To elucidate this phenomenon, this book proposes that terror is a halfway house between the real and the imaginary. For what characterizes terrorism is less the single act of violence than it is the fact that this act is perceived to be the beginning, or part, of a potential series, and that further acts are expected to occur. As turn-of-the-century writers such as Stevenson and Conrad were the first to point out, this gives terror a fantastical dimension, a fact reinforced by the clandestine nature of both terrorist and counter-terrorist operations. Supported by contextual readings of selected texts and films from *The Dynamiter* and *The Secret Agent* through late-Victorian science fiction to post-9/11 novels and cinema, this study explores the complex interplay between actual incidents of political violence, the surrounding discourse, and fictional engagement with the issue to show how terrorism becomes an object of fantasy. Drawing on research from a variety of disciplines, *The Cultural Imaginary of Terrorism* will be a valuable resource for those with interests in the areas of Literature and Film, Terrorism Studies, Peace and Conflict Studies, Trauma Studies, and Cultural Studies.

Resisting Economic Globalization Jan 01 2020 There is at present much disenchantment with the rules governing international investment. Conceived as a set of disciplines establishing thresholds of tolerable state behaviour, dissatisfaction has precipitated acts of resistance in various parts of the world. *Resisting Economic Globalization* explores the magnitude of the legal constraints imposed by these rules and institutions associated with the worldwide spread of neoliberalism. Much contemporary theorizing has given up on national states as a locus for countering the harmful effects of economic globalization. Though states provide critical supports to the construction and ongoing maintenance of transnational legal constraints, David Schneiderman argues that states remain crucial sites for resisting, even rolling back, investment law disciplines. Structured as a series of encounters with selected critical theorists, the book contrasts theoretical diagnoses with recent episodes of resistance impeding investment law edicts. This novel approach tests contemporary hypotheses offered by leading political and legal theorists about the nature of power and the role of states and social movements in facilitating and undoing neoliberalism's legal edifices. As a consequence, the foundations of transnational legality become more apparent and the mechanisms for change more transparent.

*The Walker* Jan 13 2021 There is no such thing as the wrong step; every time we walk we are going somewhere. Moving around the modern city becomes more than from getting from A to B, but a way of understanding who and where you are. In a series of riveting intellectual rambles, Matthew Beaumont, retraces a history of the walker. From Charles Dicken's insomniac night rambles to wandering through the faceless, windswept monuments of the neoliberal city, the act of walking is one of escape, self-discovery, disappearances and potential revolution. Pacing stride for stride alongside such literary amblers and thinkers as Edgar Allen Poe, Andrew Breton, H G Wells, Virginia Woolf, Jean Rhys and Ray Bradbury, Matthew Beaumont explores the relationship between the metropolis and its pedestrian life. He asks can you get lost in a crowd? Is it polite to stare at people walking past on the street? What differentiates the city of daylight and the nocturnal metropolis? What connects walking, philosophy and the big toe? Can we save the city - or ourselves - by taking the pavement?

*The World in a Selfie* Apr 27 2022 We've all been tourists at some point in our lives. How is it we look so condescendingly at people taking selfies in front of the Tower of Pisa? Is there really much to distinguish the package holiday from hipster city-breaks to Berlin or Brooklyn? Why do we engage our free time in an activity we profess to despise? *The World in a Selfie* dissects a global cultural phenomenon. For Marco D'Eramo, tourism is not just the most important industry of the century, generating huge waves of people and capital, calling forth a dedicated infrastructure, and upsetting and repurposing the architecture and topography of our cities. It also encapsulates the problem of modernity: the search for authenticity in a world of ersatz pleasures. D'Eramo retraces the grand tours of the first globetrotters – from Francis Bacon and Samuel Johnson to Arthur de Gobineau and Mark Twain – before assessing the cultural meaning of the beach holiday and the 'UNESCO-cide' of major heritage sites. The tourist selfie will never look the same again.

**Women and Islam** Aug 08 2020 Ibtissam Bouachrine's *Women and Islam: Myths, Apologies, and the Limits of Feminist Critique* calls for a shift away from the unproductive paradigm of "us" vs. the West that has informed discourse on Muslim women and feminism in the post-9/11 era. Bouachrine challenges and calls for further challenge to the long-celebrated myths and ideologies that have circulated in academic and non-academic circles about Muslim women and the role of feminism, both within and outside the Muslim world.

Balibar and the Citizen Subject Jul 19 2021 Explores the core of Balibar's work since 1980. This collection explores Balibar's rethinking of the connections between subjection and subjectivity by tracing the genealogies of these concepts in their discursive history. The 12 essays provide an overview of Balibar's work after his collaboration with Althusser. They explain and expand his framework; in particular, by restoring Arabic and Islamic thought to the conversation on the citizen subject. The collection includes two previously untranslated essays by Balibar himself on Carl Schmitt and Thomas Hobbes. Key Features: The first English-language edited collection to focus on Balibar. Presents and explains Balibar's key contributions to political theory and the history of political philosophy. Includes two essays by Balibar himself on Carl Schmitt and Thomas Hobbes: 'Schmitt's Hobbes, Hobbes's Schmitt' and 'The Mortal God and his Faithful Subjects: Hobbes, Schmitt and the Antinomies of Secularism'. Contributors include Atienne Balibar, Nancy Armstrong, Giorgos Fourtounis, Mohamed Moulfi.

**Discourses and Practices of Terrorism** Oct 29 2019 This interdisciplinary book investigates the consequences of the language of terror for our lives in democratic societies. The approach of this book is in direct contrast with those that either view terrorism simplistically, as a clear reality threatening democratic society and thus requiring certain sorts of response, or argue, equally simplistically, that the invocation of terror is merely the ideological veil for continued capitalist exploitation. While closer in spirit to the second of these, this work does not simply dismiss the discourse on terror, but rather investigates the consequences of this discourse for the organisation of life in democratic societies. In interrogating the discourse of terror from a variety of viewpoints, this interdisciplinary text builds upon

the understanding of the importance of the language of terror from a new perspective: the interconnections between discourses of terror; the material realities they at once reflect and help produce; and the specificities of particular historical circumstances. In offering an integrated approach of this sort, and founded on a base of applied philosophy, broadly conceived, the contributors offer a new contribution to both public and academic debate, and at the same time initiate a series of further interventions in Critical Terrorism Studies. This book will be of interest to students of critical terrorism studies, terrorism studies, security studies, philosophy and discourse theory. Bob Brecher is Director of the Centre for Applied Philosophy, Politics & Ethics at Brighton University. He has published widely in moral, political and applied philosophy and the politics of higher education. Mark Devenney is Academic Programme Leader in Humanities at the University of Brighton. He has published in the areas of critical theory, post-Marxism and post-Colonial politics. Aaron Winter is Lecturer in Sociology at the University of Abertay Dundee. His research focuses on terrorism and the concept of 'extremism', whiteness, masculinity and violence, and the extreme right, organised racism and the religious right in the United States.

Art in Consumer Culture Jan 31 2020 Written with beautiful clarity, *Art in Consumer Culture: Mis-Design* asks the contemporary art world to be honest about the pervasive effects of commodification and the difficulty of staging critique. The book examines the collusion of 'art' and 'design' in contemporary artistic practices in order to find avenues of critique in a commercially driven cultural landscape. Grace McQuilten focuses on the work of Takashi Murakami, Andrea Zittel, Adam Kalkin and Vito Acconci, four contemporary artists who claim to be working in the field of design rather than the traditional art world. McQuilten argues that Zittel, Acconci and Kalkin engage with 'design' only to reactivate the critical practice of art in a more direct engagement with capital - and conceives of and affirms a future for art, outside of the art world, as a parasite in the complex beast of late capitalism. This book is an important and timely provocation to a cynical and apathetic consumer culture, and a call to arms for creative freedom and critical thought.

*The Universal Adversary* Dec 24 2021 The history of bourgeois modernity is a history of the Enemy. This book is a radical exploration of an Enemy that has recently emerged from within security documents released by the US security state: the Universal Adversary. The Universal Adversary is now central to emergency planning in general and, more specifically, to security preparations for future attacks. But an attack from who, or what? This book – the first to appear on the topic – shows how the concept of the Universal Adversary draws on several key figures in the history of ideas, said to pose a threat to state power and capital accumulation. Within the Universal Adversary there lies the problem not just of the 'terrorist' but, more generally, of the 'subversive', and what the emergency planning documents refer to as the 'disgruntled worker'. This reference reveals the conjoined power of the contemporary mobilisation of security and the defence of capital. But it also reveals much more. Taking the figure of the disgruntled worker as its starting point, the book introduces some of this worker's close cousins – figures often regarded not simply as a threat to security and capital but as nothing less than the Enemy of all Mankind: the Zombie, the Devil and the Pirate. In situating these figures of enmity within debates about security and capital, the book engages an extraordinary variety of issues that now comprise a contemporary politics of security. From crowd control to contagion, from the witch-hunt to the apocalypse, from pigs to intellectual property, this book provides a compelling analysis of the ways in which security and capital are organized against nothing less than the 'Enemies of all Mankind'.

Postcolonial Studies Dec 12 2020 Parry offers the compelling argument that theoretical work must strive to join remembrance of the material past with a critique of the contemporary condition, remaining unreconciled to the past and unconsolated by the present.

**New Views on R. Buckminster Fuller** Nov 10 2020 In this book, leading scholars in architecture, design, history, and communications discuss the work of R. Buckminster Fuller in the context of the larger social and cultural patterns of the twentieth century.

**Slavoj Zizek and Dialectical Materialism** Nov 22 2021 This book is the first volume to bring together the most prominent scholars who work on Slavoj Zizek's philosophy, examining and interrogating his understanding of dialectical materialism. It deserves to be thoroughly and systematically elaborated because it attempts to propose a new foundation for dialectical materialism.

Coding and Representation from the Nineteenth Century to the Present May 17 2021 An exploration of trends and cultures relating to electrical telegraphy and recent digital communications, this collection emerges from the research project *Scrambled Messages: The Telegraphic Imaginary 1866–1900*, which investigated cultural phenomena relating to the 1866 transatlantic telegraph. It interrogates the ways in which society, politics, literature and art are imbricated with changing communications technologies, from the mid-nineteenth century to the present. Contributors consider control, imperialism and capital, as well as utopianism and hope, grappling with the ways in which human connections (and their messages) continue to be shaped by communications infrastructures.

*Remaking Radicalism* May 29 2022 This book brings together documents from multiple radical movements in the recent United States from 1973 through 2001. These years are typically viewed as an era of neoliberalism, dominated by conservative retrenchment, the intensified programs of privatization and incarceration, dramatic cuts to social welfare, and the undermining of labor, antiracist, and feminist advances. Yet activists from the period proved tenacious in the face of upheaval, resourceful in creating new tactics, and dedicated to learning from one another. Persistent and resolute, activists did more than just keep radical legacies alive. They remade radicalism—bridging differences of identity and ideology often assumed to cleave movements, grappling with the eradication of liberal promises, and turning to movement cultures as the source of a just future. *Remaking Radicalism* is the first anthology of U.S. radicalisms that reveals the depth, diversity, and staying power of social movements after the close of the long 1960s. Editors Dan Berger and Emily Hobson track the history of popular struggles during a time that spans the presidencies of Richard Nixon and George W. Bush and bring to readers the political upheavals that shaped the end of the century and that continue to define the present.

Beckett's Political Imagination Mar 15 2021 *Beckett's Political Imagination* charts unexplored territory: it investigates how Beckett's bilingual texts re-imagine political history, and documents the conflicts and controversies through which Beckett's political consciousness and affirmations were mediated. The book offers a startling account of Beckett's work, tracing the many political causes that framed his writing, commitments, collaborations and friendships, from the Scottsboro Boys to the Black Panthers, from Irish communism to Spanish republicanism to Algerian nationalism, and from campaigns against Irish and British censorship to anti-Apartheid and international human rights movements. Emilie Morin reveals a very different writer, whose career and work were shaped by a unique exposure to international politics, an unconventional perspective on political action and secretive political engagements. The book will benefit students, researchers and readers who want to think about literary history in different ways and are interested in Beckett's enduring appeal and influence.

**Safeguarding the Organization Against Violence and Bullying** Oct 02 2022 In this book, the authors bring together the extant research evidence on occupational violence and bullying, estimate the costs to organizations and the community at large, examine the overlaps between manifestation in the broader community and the extent of spillover into workplaces, and identify preventive interventions that may safeguard organizations from these threats. Opportunities for safeguarding strategies to add value to organizational skills, productivity, quality and reputation amongst clients, investors and government stakeholders are emphasized.

**Cultural Activism** Sep 20 2021 This volume addresses contemporary activist practices that aim to interrupt and reorient politics as well as culture. The specific tactics analyzed here are diverse, ranging from culture jamming, sousveillance, media hoaxing, adbusting, subvertising, street art, to hacktivism, billboard liberation, and urban guerilla, to name but a few. Though indebted to the artistic and political movements of the past, this form of activism brings a novel dimension to public protest with its

insistence on humor, playfulness, and confusion. This book attempts to grasp both the old and new aspects of contemporary activist practices, as well as their common characteristics and internal varieties. It attempts to open up space for the acknowledgement of the ways in which contemporary capitalism affects all our lives, and for the reflection on possible modes of struggling with it. It focuses on the possibilities that different activist tactics enable, the ways in which those may be innovative or destructive, as well as on their complications and dilemmas. The encounter between the insights of political, social and critical theory on the one hand and activist visions and struggles on the other is urgent and appealing. The essays collected here all explore such a confrontational collaboration, testing its limits and productiveness, in theory as well as in practice. In a mutually beneficial relationship, theoretical concepts are rethought through activist practices, while those activist practices are developed with the help of the insights of critical theory. This volume brings scholars and activists together in the hope of establishing a productive dialogue between the theorizations of the intricacies of our times and the subversive practices that deal with them.

*Cultural Resistance Reader* Feb 23 2022 From the Diggers seizing St. George Hill in 1649 to Hacktivists staging virtual sit-ins in the 21st century, from the retributive fantasies of Robin Hoods to those of gangsta rappers, culture has long been used as a political weapon. This expansive and carefully crafted reader brings together many of the classic texts that help to define culture as a tool of resistance. With concise, illuminating introductions throughout, it presents a range of theoretical and historical writings that have influenced contemporary debate, and includes a number of new activist authors published here for the first time. *Cultural Resistance Reader* is both an invaluable scholarly resource and a tool for political activists. But most importantly it will inspire everyday readers to resist.

*Imperial Subjects* Jun 29 2022 This highly original work posits that the changes in the nature of citizenship caused by neoliberal globalization must be understood as the result of an ongoing imperial project. Although they may seem admirable, policies such as humanitarian and citizenship rights are really an imperial venture led by global institutions and corporations in order to export capitalist market forces worldwide. This entails a form of neoliberal citizenship in which social security is replaced by market insecurity and rising inequality. In this light, the citizen becomes an "imperial subject" whose needs and desires have been colonized by the global market. However, emerging social forces in Latin America and elsewhere have begun to challenge this imperialist logic, fostering a resistance that may bring forth a new global vision of citizenship. This unique analysis draws together neoliberal citizenship, new imperialism, and the creation of 'financial subjects' into an innovative theoretical exploration. By expanding the debate on global citizenship, *Imperial Subjects* will engage readers in political and social sciences interested in contemporary political thought, citizenship, and globalization.

*Bad New Days* Jan 25 2022 One of the world's leading art theorists dissects a quarter century of artistic practice *Bad New Days* examines the evolution of art and criticism in Western Europe and North America over the last twenty-five years, exploring their dynamic relation to the general condition of emergency instilled by neoliberalism and the war on terror. Considering the work of artists such as Thomas Hirschhorn, Tacita Dean, and Isa Genzken, and the writing of thinkers like

Jacques Rancière, Bruno Latour, and Giorgio Agamben, Hal Foster shows the ways in which art has anticipated this condition, at times resisting the collapse of the social contract or gesturing toward its repair; at other times burlesquing it. Against the claim that art making has become so heterogeneous as to defy historical analysis, Foster argues that the critic must still articulate a clear account of the contemporary in all its complexity. To that end, he offers several paradigms for the art of recent years, which he terms “abject,” “archival,” “mimetic,” and “precarious.”

**Tactical Performance** Feb 11 2021 *Tactical Performance* tells fun, mischievous stories of underdogs speaking mirth to power - through creative, targeted activist performance in the streets of cities around the world. Bogard, one of the most prolific practitioners and scholars of this genre, shares the most effective non-violent tactics and theatrics employed by groups which have captured the public imagination in recent years. *Tactical Performance* explores carnivalesque protest in unique depth, looking at the possibilities for direct action and sometimes shocking confrontation with some of the most powerful institutions in the world. It is essential reading for anyone interested in creative pranksterism and the global justice movement.

*Georges Perec's Geographies* Aug 20 2021 Georges Perec, novelist, filmmaker and essayist, was one of the most inventive and original writers of the twentieth century. A fascinating aspect of his work is its intrinsically geographical nature. With major projects on space and place, Perec's writing speaks to a variety of geographical, urban and architectural concerns, both in a substantive way, including a focus on cities, streets, homes and apartments, and in a methodological way, experimenting with methods of urban exploration and observation, classification, enumeration and taxonomy. Georges Perec's *Geographies* is the first book to offer a rounded picture of Perec's geographical interests. Divided into two parts, Part I, *Perec's Geographies*, explores the geographies within Perec's work in film, literature and radio, from descriptions of streets to the spaces of his texts, while Part II, *Perecquian Geographies*, explores geographies in a range of material and metaphorical forms, including photographic essays, soundscapes, theatre, dance and writing, created by those directly inspired by Perec. *Georges Perec's Geographies* extends the body of Perec criticism beyond Literary and French Studies to disciplines including Geography, Urban Studies, Planning and Architecture to offer a complete and systematic examination of Georges Perec's geographies. The diversity of readings and approaches will be of interest not only to Perec readers and fans but to students and researchers across these subjects.

**Routledge Revivals: The Challenge of Islam (2005)** Jun 25 2019 First published in 2005, this book addresses the challenges arising from Christian-Muslim encounter and attempts to enable outsiders to understand the religion of Islam. The author offers distinctive perspectives that compliment much other literature in the study of Islam and in particular Christian-Muslim relations and the relation of Islam and the west. The book is divided into three parts: Part I constitutes an introduction to Islam, Part II delves into aspects of the wider encounter with Islam and Part III explores issues in regard to the prospect of engaging in dialogue with Islam. The author argues that in the post-9/11 world the imperative to understand and engage with Islam is urgent and intends this work to assist the reader in doing so.

*Liberal Terror* Jun 17 2021 Security is meant to make the world safer. Yet despite living in the most secure of times, we see endangerment everywhere. Whether it is the threat of another devastating terrorist attacks, a natural disaster or unexpected catastrophe, anxieties and fears define the global political age. While liberal governments and security agencies have responded by advocating a new catastrophic topography of interconnected planetary endangerment, our desire to securitize everything has rendered all things potentially terrifying. This is the fateful paradox of contemporary liberal rule. The more we seek to secure, the more our imaginaries of threat proliferate. Nothing can therefore be left to chance. For everything has the potential to be truly catastrophic. Such is the emerging state of terror normality we find ourselves in today. This illuminating book by Brad Evans provides a critical evaluation of the wide ranging terrors which are deemed threatening to advanced liberal societies.

Moving beyond the assumption that liberalism is integral to the realisation of perpetual peace, human progress, and political emancipation on a planetary scale, it exposes how liberal security regimes are shaped by a complex life-centric rationality which directly undermines any claims to universal justice and co-habitation. Through an incisive and philosophically enriched critique of the contemporary liberal practices of making life more secure, Evans forces us to confront the question of what it means to live politically as we navigate through the dangerous uncertainty of the 21st Century.
