Reading in the Digital Age: Young Children's Experiences with E-books Jul 30 2020 This edited book focuses on affordances and limitations of e-books for early language and literacy, features and design of e-books for early language and literacy, print versus e-books in early language and literacy development, and uses of and guidelines for how to use e-books in school and home literacy practices. Uniquely, this book includes critical reviews of diverse aspects of e-books (e.g., features) and e-book uses (e.g., independent reading) for early literacy as well as multiple examinations of e-books in home and school contexts using a variety of research methods and/or theoretical frames. The studies of children's engagement with diverse types of e-books in different social contexts provide readers with a contemporary and comprehensive understanding of this topic. Research has demonstrated that ever-increasing numbers of children use digital devices as part of their daily routine. Yet, despite children's frequent use of e-books from an early age, there is a limited understanding regarding how those e-books are actually being used at home and school. As more e-books become available, it is important to examine the educational benefits and limitations of different types of e-books for children. So far, studies on the topic have presented inconsistent findings regarding potential benefits and limitations of e-books for early literacy activities (e.g., independent reading, shared reading). The studies in this book aim to fill such gaps in the literature.

Building Intelligent Interactive Tutors Jun 09 2021 Building Intelligent Interactive Tutors discusses educational systems that assess a student's knowledge and are adaptive to a student's learning needs. The impact of computers has not been generally felt in education due to lack of hardware, teacher training, and sophisticated software. and because current instructional software is neither truly responsive to student needs nor flexible enough to emulate teaching. Dr. Woolf taps into 20 years of research on intelligent tutors to bring designers and developers a broad range of issues and methods that produce the best intelligent learning environments possible, whether for classroom or life-long learning. The book describes

multidisciplinary approaches to using computers for teaching, reports on research, development, and real-world experiences, and discusses intelligent tutors, web-based learning systems, adaptive learning systems, intelligent agents and intelligent multimedia. It is recommended for professionals, graduate students, and others in computer science and educational technology who are developing online tutoring systems to support e-learning, and who want to build intelligence into the system. Threshold Dwellers in the Age of Global Pandemic Apr 07 2021 So many lives have been lost now and the death toll still continues to rise because of the COVID-19 pandemic. The poor and the marginalized, not surprisingly, have been disproportionately affected. The pandemic has exposed the fault lines not only in our healthcare but also in our political and economic system, a system driven by the pursuit of the bottom line-- profits. If we are not only to survive but also thrive as a global society, the challenge of the coronavirus pandemic must lead us to explore ways of thinking, being, and dwelling that promote our shared flourishing. It is time to take personal stock about ourselves: who we are, where we have been, and where we are heading. What can the pandemic teach us about ourselves? What is it revealing about us and our situation? How shall we dwell together? Do we want to wake up to a new and better tomorrow after this nighttime of pandemic? That will largely depend on the way we respond now. Who are we becoming in this time of pandemic? What daily practices are we doing as embodiments of the new world we are anticipating?

Public Relations in the Military Apr 26 2020 This book takes an in-depth look at the function of public relations as it exists in the U.S. military in the 21st Century. There have been several books and journal articles covering the military/media relationship but none that delve into breadth and depth of the responsibilities of today's military public affairs officer. This book discusses the concept and foundations of military public affairs (relations), the changing strategic landscape in communications, operational planning and execution and the people who practice military public affairs. The goal is to broaden knowledge and understanding of this vital, but little discussed, area of public relations among civilian and military public relations and communications professionals, faculty and staff in public relations programs, military leaders, as well as the U.S. civilian populace, and research scholars specializing in military public relations or public affairs operations.

Groan in the Throat Vol. 1 Jan 24 2020 Provocatively explaining the political and social phenomenon of white supremacy as a religion and providing a theology of redemption for disparaged communities affected by it, this book is a collection of personal and academic essays that challenge popular notions of American exceptionalism. A little bit of everything, a mixtape in the tradition of DJ Clue, episodic and rhapsodic, lifting a panoply of voices in an unexpected way, it wrestles with theology and philosophy alike, blending poetry with narrative nonfiction and memoir. It is a creation of a new and expressive literary experience that is as tragic and triumphant as the Black experience is in America--a groaning that cannot be uttered.

The Hive Jun 16 2019 A Winner of People Magazine's Best Books for Fall 2019. New York Times bestselling authors Barry Lyga and Morgan Baden have teamed up for the first time to create a novel that's gripping, terrifying and more relevant every day. Cassie McKinney has always believed in the Hive. Social media used to be out of control, after all. People were torn apart by trolls and doxxers. Even hackers — like Cassie's dad — were powerless against it. But then the Hive came. A better way to sanction people for what they do online. Cause trouble, get too many "condemns," and a crowd can come after you, teach you a lesson in real life. It's safer, fairer and perfectly legal. Entering her senior year of high school, filled with grief over an unexpected loss, Cassie is primed to lash out. Egged on by new friends, she makes an edgy joke online. Cassie doubts anyone will notice. But the Hive notices everything. And as her viral comment whips an entire country into a frenzy, the Hive demands retribution. One moment Cassie is anonymous; the next, she's infamous. And running for her life. With nowhere to turn, she must learn to rely on herself — and a group of Hive outcasts who may not be reliable — as she slowly uncovers the truth about the machine behind the Hive.

Transmedia Change Jan 04 2021 This book examines and illustrates the use of design principles, design thinking, and other empathy research techniques in university and public settings, to plan and ethically target socially-concerned transmedia stories and evaluate their success through user experience testing methods. All media industries continue to adjust to a dispersed, diverse, and dilettante mediascape where reaching a large global audience may be easy but communicating with a decisive and engaged public is more difficult. This challenge is arguably toughest for communicators who work to engage a public with reality rather than escape. The chapters in this volume outline the pedagogy and practice of design, empathy research methods for story development, transmedia logics for socially-concerned stories, development of community engagement and the embrace of collective narrative, art and science research collaboration, the role of mixed and virtual reality in prosocial communication, ethical audience targeting, and user experience testing for storytelling campaigns. Each broad topic includes case examples and full case studies of each stage in production. Offering a detailed exploration of a fast-emerging area, this book will be of great relevance to researchers and university teachers of socially-concerned transmedia storytelling in fields such as journalism, documentary filmmaking, education, and activism.

The Student's Guide to Digital Publishing Jul 22 2022 Are you interested in digital publishing? Maybe you are a beginning writer, or maybe you are an experienced writer who now finds that your old skills need to be re-sharpened for digital environments. Whether you want to write engaging articles, edit a digital publication for your employer, or self-publish your own novel, this guide is for you. The Student's Guide to Digital Publishing aims to teach the complete layman or undergraduate. No special expertise is needed. Our presumption that readers come to this book with little knowledge beyond that of the consumer. Most people find themselves reading and writing in digital environments all day long, yet from elementary school through university have not had a single lesson on how writing for those environments is different than writing for print. Digital publishing went from being on the periphery to being the dominant form of publishing so quickly that most of the pioneers in the field are still alive. As early

adopters of digital publishing experimented, they quickly found that most of the evergreen writing skills taught in school still apply. Some of those skills, however, need to be presented in new ways. Since digital publishing is the future for most forms of writing, beginners need guidance and formal training beyond the skills of traditional print writing. This book provides the starting point you need.

World Wide Waste: How Digital Is Killing Our Planetâ and What We Can Do About It Jul 10 2021 Speaking out when it's unpopular. Back in the day, Henry David Thoreau raged at the robber barons-the big shots of their age, despoiling the environment in the name of progress. Deep in the throes of the seemingly unstoppable growth of tech, a modern-day Thoreau has emerged in the guise of Gerry McGovern-decrying the massive, hidden negative impacts of tech on the environment. McGovern has thoroughly documented in World Wide Waste how tech damages the Earth-and what we should be doing about it. It is not just the acres of discarded computer hardware conveniently dumped in Third World countries. Every time an email is downloaded it contributes to global warming. Every tweet, search, check of a webpage creates pollution. Digital is physical. Those data centers are not in the Cloud. They're on land in massive physical buildings packed full of computers hungry for energy. It seems invisible. It seems cheap and free. It's not. Digital costs the Earth.

Law and Time Aug 11 2021 Research on law's relationship with time has flourished over the past decade. This edited collection aims to put law and time scholarship into wider context, advancing conversations on time and temporalities between socio-legal scholars, anthropologists, sociologists, geographers and historians. Through a diverse range of contributions, the collection explores how legal modalities of time emerge and have effects within wider clusters of social and political action. Themes include: law's diverse roles in maintaining linear historicist models of time; law's participation in the materialisation of times; and the unsteady effects of temporal pluralism and polytemporalities in law. De-naturalising the 'time' in law and time scholarship, this collection positions time as something that can be enacted and materialised as well as experienced, with distinct implications for questions of social justice.

Toward a More Perfect Union Oct 13 2021 It has sadly become evident that over the past seventy years, Americans have become increasingly ignorant of our nation's founding principles. Civic education and American history have either not been taught or have been deliberately mistaught throughout our nation's public— and in numerous cases, even our private—education system. This lack of education or misinformation has placed our nation in great peril, and we are seeing the consequences unfold daily in our corporate boardrooms, halls of power, and streets. This book is the prescription for returning our nation to a healthy culture for all.

On the End of Privacy May 28 2020 In preparation for this book, and to better understand our screen-based, digital world, Miller only accessed information online for seven years. On the End of Privacy explores how literacy is transformed by online technology that lets us instantly publish anything that we can see or hear. Miller examines the 2010 suicide of Tyler Clementi, a young college student who jumped off the George Washington Bridge after he discovered that his roommate spied on him via webcam. With access to the text messages, tweets, and chatroom posts of those directly involved in this tragedy, Miller asks: why did no one intervene to stop the spying? Searching for an answer to that question leads Miller to online porn sites, the invention of Facebook, the court-martial of Chelsea Manning, the contents of Hillary Clinton's email server, Anthony Weiner's sexted images, Chatroulette, and more as he maps out the changing norms governing privacy in the digital age.

Pictures of a Gone City Oct 21 2019 The San Francisco Bay Area is currently the jewel in the crown of capitalism—the tech capital of the world and a gusher of wealth from the Silicon Gold Rush. It has been generating jobs, spawning new innovation, and spreading ideas that are changing lives everywhere. It boasts of being the Left Coast, the Greenest City, and the best place for workers in the USA. So what could be wrong? It may seem that the Bay Area has the best of it in Trump's America, but there is a dark side of success: overheated bubbles and spectacular crashes; exploding inequality and millions of underpaid workers; a boiling housing crisis, mass displacement, and severe environmental damage; a delusional tech elite and complicity with the worst in American politics. This sweeping account of the Bay Area in the age of the tech boom covers many bases. It begins with the phenomenal concentration of IT in Greater Silicon Valley, the fabulous economic growth of the bay region and the unbelievable wealth piling up for the 1% and high incomes of Upper Classes—in contrast to the fate of the working class and people of color earning poverty wages and struggling to keep their heads above water. The middle chapters survey the urban scene, including the greatest housing bubble in the United States, a metropolis exploding in every direction, and a geography turned inside out. Lastly, it hits the environmental impact of the boom, the fantastical ideology of TechWorld, and the political implications of the tech-led transformation of the bay region.

Foolishness to Gentiles Aug 31 2020 What happens to the Gospel when you put other loyalties into positions of power in Christian life and practice? You get deformations, distortions, and caricatures of Christianity - killing in the name of love, defense of worldwide systems of domination, idolization of the nation instead of the membership in the global body of Christ, and baptism of exploitative and destructive economic ideologies. You get much of what world sees as contemporary Christianity, in other words. Too often, however, the inadequacies of contemporary Christian life, especially in the United States, are seen as separate issues in need of 'improvement' or 'reform.' Foolishness to Gentiles invites readers to see the pathologies of the churches not as a series of disconnected problems, but predictable outcomes of deep defects of Christian formation, commitments and theology. Having mortgaged so much of the integrity of the Gospel in the pursuit of imperial and national citizenship, and having allowed the powers of race and capital to divide the unity of the church, Foolishness to Gentiles calls Christians into deeper reflection, repentance and redirection. In a series of essays (new and previously unpublished, previously unpublished in English, and published previously in specialized venues), Foolishness to Gentiles opens doors to deeper theological and socio-political reflection, and some guideposts for more adequate practices of Christian discipleship in a variety of contexts and circumstances.

Comprehension First Feb 17 2022 This book is about designing instruction that makes comprehension the priority in reading and in content area study. The comprehension model described responds to calls from literacy experts and professional organizations for inquiry-based instruction that prepares readers to be active meaning makers who are adept at both critical and creative thinking. Comprehension First introduces a before, during, after Comprehension Problem Solving (CPS) process that helps readers ask key questions so they arrive at a substantial comprehension product-"big ideas" based on themes and conclusions drawn from literary works and expository texts. The book further describes how to orchestrate research-based best practices to build lessons and units around big ideas and important questions. In this age of multiple literacies, all of us must learn to be more nimble users of Literacy 2.0 communication tools. Mastering problem solving is at the core of this challenge. Comprehension First embraces this challenge by inviting present and future teachers to examine WHY and HOW these tools can be used more purposefully to achieve the pre-eminent literacy goal of deep comprehension.

Interactive Journalism Dec 23 2019 Interactive journalism has transformed the newsroom. Emerging out of changes in technology, culture, and economics, this new specialty uses a visual presentation of storytelling that allows users to interact with the reporting of information. Today it stands at a nexus: part of the traditional newsroom, yet still novel enough to contribute innovative practices and thinking to the industry. Nikki Usher brings together a comprehensive portrait of nothing less than a new journalistic identity. Usher provides a comprehensive history of the impact of digital technology on reporting, photojournalism, graphics, and other disciplines that define interactive journalism. Her eyewitness study of the field's evolution and accomplishments ranges from the interactive creation of Al Jazeera English to the celebrated data desk at the Guardian to the New

York Times' Pulitzer-endowed efforts in the new field. What emerges is an illuminating, richly reported portrait of the people coding a revolution that may reverse the decline and fall of traditional journalism.
