*What is this thing called Knowledge?* Jan 11 2021 *What is knowledge? Where does it come from? What kinds of knowledge are there? Can we know anything at all? This lucid and engaging introduction grapples with these central questions in the theory of knowledge, offering a clear, non-partisan view of the main themes of epistemology. Both traditional issues and contemporary ideas are discussed in sixteen easily digestible chapters, each of which conclude with a useful summary of the main ideas discussed, study questions, annotated further reading and a guide to internet resources. Each chapter also features text boxes providing bite-sized summaries of key concepts and major philosophers, and clear and*

interesting examples are used throughout. The book concludes with an annotated guide to general introductions to epistemology, a glossary of key terms, and a summary of the main examples used in epistemology. This is an ideal first textbook in the theory of knowledge for undergraduates coming to philosophy for the first time. The third edition has been revised and updated throughout and features two new chapters, on religious knowledge and scientific knowledge, as part of a whole new section on what kinds of knowledge there are. In addition, the text as a whole has been refreshed to keep it up to date with current developments.

*What Is the Grass: Walt Whitman in My Life* Aug 30 2022 Named a Most Anticipated Book of 2020 by BuzzFeed, Library Journal, The Millions, and The Rumpus Effortlessly blending biography, criticism, and memoir, National Book Award–winning poet and best-selling memoirist Mark Doty explores his personal quest for Walt Whitman. Mark Doty has always felt haunted by Walt Whitman’s bold, perennially new American voice, and by his equally radical claims about body and soul and what it means to be a self. In *What Is the Grass*, Doty—a poet, a New Yorker, and an American—keeps company with Whitman and his *Leaves of Grass*, tracing the resonances between his own experience and the legendary poet’s life and work. What is it then between us? Whitman asks. In search of an answer, Doty explores spaces—both external and internal—where he finds the poet’s ghost. He meditates on desire, love, and the mysterious wellsprings of the poet’s enduring work: a radical experience of transformation and enlightenment, queer sexuality, and an obsession with death, as well as unabashed love for a great city and for the fresh, rowdy character of American speech. In riveting close readings threaded with personal memoir and illuminated by awe, Doty reveals the power of Whitman’s persistent presence in his life and in the American imagination at large. How does a voice survive death? *What Is the Grass* is a conversation across time and space, a study of the astonishment one poet finds in the accomplishment of another, and an attempt to grasp Whitman’s deeply hopeful vision of human possibility.

*The Fourth Industrial Revolution* Nov 20 2021 World-renowned economist Klaus Schwab, Founder and Executive Chairman of the World Economic Forum, explains that we have an opportunity to shape the fourth industrial revolution, which will fundamentally alter how we live and work. Schwab argues that this revolution is different in scale, scope and complexity from any that have come before. Characterized by a range of new technologies that are fusing the physical, digital and biological worlds, the developments are affecting all disciplines, economies, industries and governments, and even challenging ideas about what it means to be human. Artificial intelligence is already all around us, from supercomputers, drones and virtual assistants to 3D printing, DNA sequencing, smart thermostats, wearable sensors and microchips smaller than a grain of sand. But this is just the beginning: nanomaterials 200 times stronger than steel and a million times thinner than a strand of hair and the first transplant of a 3D printed liver are already in development. Imagine “smart factories” in which global systems of manufacturing are coordinated virtually, or implantable mobile phones made of biosynthetic materials. The fourth industrial revolution, says Schwab, is more significant, and its ramifications more profound, than in any prior period of human history. He outlines the key technologies driving this revolution and discusses the major impacts expected on government, business, civil society and individuals. Schwab also offers bold ideas on how to harness these changes and shape a better future—one in which technology empowers people rather than replaces them; progress serves society rather than disrupts it; and in which innovators respect moral and ethical boundaries rather than cross them. We all have the opportunity to contribute to developing new frameworks that advance progress.

*What is Rhetoric?* Mar 13 2021 This book offers a new approach to the principles and functioning of rhetoric. In everyday life, we often debate issues or simply discuss questions. Rhetoric is the way in which we answer questions in an interpersonal context, when we want to have an effect on those with whom we are communicating. They can be convinced or charmed, persuaded or influenced, and the language used can range from reasoning to the sharing of narratives, literary or otherwise. *What is Rhetoric?* provides a breakthrough in the field, offering a systematic and unified view of the topic. The book combines the social aspects of rhetoric, such as the negotiation of distance between speakers, with the theory of emotions. All the principal authors from Plato and Aristotle to contemporary theorists are integrated into Michel Meyer's 'problematological' conception of rhetoric, based on the primacy of questioning and answering in language and thought.

**What Is the Bible and Who Is It For?** Nov 28 2019 If you are new to the Bible or believe that the Bible an outdated, pre-scientific relic of by-gone eras or if you are skeptical or confused, then this book is for you. Let's face it, the Bible is unread, underappreciated, with an unlikely plot. We may say that the Bible is an important book, but few really understand how it came to be or what really it says, and some of us just think it is complete nonsense. Many of the stories seem archaic and out of touch with modern culture. Yet if we look closely, the Bible contains timeless wisdom and principles that are very much applicable. This book offers an easy-to-understand explanation of the origins and purposes of the Bible. It will give modern perspectives on how we might read and understand scripture today in light of all that we know (and don't know) about the world. Importantly, it addresses how the Bible can be understood in light how we think today.

*What Color Is the Sacred?* Oct 08 2020 Over the past thirty years, visionary anthropologist Michael Taussig has crafted a highly distinctive body of work. Playful, enthralling, and whip-smart, his writing makes ingenious connections between ideas, thinkers, and things. An extended meditation on the mysteries of color and the fascination they provoke, *What Color Is the Sacred?* is the next step on Taussig's remarkable intellectual path. Following his interest in magic and surrealism, his earlier work on mimesis, and his recent discussion of heat, gold, and cocaine in *My Cocaine Museum*, this book uses color to explore further dimensions of what Taussig calls "the bodily unconscious" in an age of global warming. Drawing on classic ethnography as well as the work of Benjamin, Burroughs, and Proust, he takes up the notion that color invites the viewer into images and into the world. Yet, as Taussig makes clear, color has a history—a manifestly colonial history rooted in the West's discomfort with color, especially bright color, and its associations with the so-called primitive. He begins by noting Goethe's belief that Europeans are physically averse to vivid color while the uncivilized revel in it, which prompts Taussig to reconsider colonialism as a tension between chromophobes and chromophiliacs. And he ends with the strange story of coal, which, he argues, displaced colonial color by giving birth to synthetic colors, organic chemistry, and IG Farben, the giant chemical corporation behind the Third Reich. Nietzsche once wrote, "So far, all

that has given colour to existence still lacks a history.” With *What Color Is the Sacred?* Taussig has taken up that challenge with all the radiant intelligence and inspiration we’ve come to expect from him.

*What is the Genus?* May 15 2021 Exploring several of the evolutionary branches of the mathematical notion of genus, this book traces the idea from its prehistory in problems of integration, through algebraic curves and their associated Riemann surfaces, into algebraic surfaces, and finally into higher dimensions. Its importance in analysis, algebraic geometry, number theory and topology is emphasized through many theorems. Almost every chapter is organized around excerpts from a research paper in which a new perspective was brought on the genus or on one of the objects to which this notion applies. The author was motivated by the belief that a subject may best be understood and communicated by studying its broad lines of development, feeling the way one arrives at the definitions of its fundamental notions, and appreciating the amount of effort spent in order to explore its phenomena.

***Evil Geniuses*** May 03 2020 NEW YORK TIMES BESTSELLER • When did America give up on fairness? The author of *Fantasyland* tells the epic history of how America decided that big business gets whatever it wants, only the rich get richer, and nothing should ever change—and charts a way back to the future. "Essential, absorbing . . . a graceful, authoritative guide . . . a radicalized moderate's moderate case for radical change."—*The New York Times Book Review* During the twentieth century, America managed to make its economic and social systems both more and more fair and more and more prosperous. A huge, secure, and contented middle class emerged. All boats rose together. But then the New Deal gave way to the Raw Deal. Beginning in the early 1970s, by means of a long war conceived of and executed by a confederacy of big business CEOs, the superrich, and right-wing zealots, the rules and norms that made the American middle class possible were undermined and dismantled. The clock was turned back on a century of economic progress, making greed good, workers powerless, and the market all-powerful while weaponizing nostalgia, lifting up an oligarchy that served only its own interests, and leaving the huge majority of Americans with dwindling economic prospects and hope. Why and how did America take such a wrong turn? In this deeply researched and brilliantly woven cultural, economic, and political chronicle, Kurt Andersen offers a fresh, provocative, and eye-opening history of America's undoing, naming names, showing receipts, and unsparingly assigning blame—to the radical right in economics and the law, the high priests of high finance, a complacent and complicit Establishment, and liberal "useful idiots," among whom he includes himself. Only a writer with Andersen's crackling energy, deep insight, and ability to connect disparate dots and see complex systems with clarity could make such a book both intellectually formidable and vastly entertaining. And only a writer of Andersen's vision could reckon with our current high-stakes inflection point, and show the way out of this man-made disaster.

*What is the New Rhetoric?* Apr 25 2022 The Age of Information has spawned a critical focus on human communication in a multimedia world, particularly on theories and practices of writing. With the worldwide web impacting increasingly on academic and business communication, the need has never been greater for advanced study in writing, communication, and critical thinking across all genres, sectors, and cultures. In recent decades, the definitions of 'new rhetoric' have expanded to encompass a variety of theories and movements, raising the question of how rhetoric is understood and employed in the twenty-first century. The essays collected here represent variations on these themes, with each attempting to answer the title's deliberately provocative question, addressing particularly: -How the classical art of rhetoric is still relevant today; -How it is directly related to modern technologies and the new modes of communication they have generated; -How rhetorical practice is informing research methodologies and teaching and learning practices in the contemporary academy.

What is a Madrasa? Oct 20 2021 The prospects for peace in Afghanistan, dialogue between Washington and Tehran, the UN's bid to stabilise nuclear-armed Pakistan, understanding the largest Muslim minority in the world's largest democracy in India, or the largest Muslim population in the world in Indonesia all require some knowledge of the traditional religious sectors in these countries and of what connection traditional religious schooling has (or not) to their geopolitical situations. Moosa delves into the world of madrasa classrooms, scholars and texts, recounting the daily life and discipline of the inhabitants. He shows that madrasa are a living, changing entity, and the site of contestation between groups with varying agendas, goals and notions of modernity. Reading this unique and engaging introduction will provide readers with a clear grasp of the history, place and function of the madrasa in today's Muslim world (religious, cultural and political). It will also investigate the ambiguity underlying the charge that the madrasa is at heart a geopolitical institution.

**What is History? and Other Late Unpublished Writings** Nov 08 2020 This volume contains the most significant pieces of unpublished writing completed by Eric Voegelin during an important time of his career. Spanning the period from the early 1960s to the late 1970s, these selections supplement the body of work Voegelin published after the appearance of the first three volumes of *Order and History* in 1956 and 1957. The five texts included here are "What Is History?" "Anxiety and Reason," "The Eclipse of Reality," "The Moving Soul," and "The Beginning and the Beyond." In their introduction to the volume, Thomas A. Hollweck and Paul Caringella place these writings in their proper context and discuss the ways in which they reveal clues to the evolution of Voegelin's thought. In "What Is History?" Voegelin considers the development of a transcendent structure of history while simultaneously rejecting the notion that history can have a universal meaning. "Anxiety and Reason" focuses on Voegelin's critically important theory of historiogenesis, which links events in pragmatic history with legendary and mythical events leading back to the beginning of the cosmic order. In "The Eclipse of Reality," Voegelin presents a critique of modernity by analyzing the work of Sartre, Schiller, Comte, and others. "The Moving Soul"--a "thought experiment" inspired by a remark Henry Margenau makes in *The Nature of Physical Reality*--attempts to reformulate the connections between physics and myth. The most important of these essays is "Me Beginning and the Beyond." Here Voegelin meditates on the universality of experience formed by the tension of existence under God. Publication of these previously unpublished writings will enable scholars to trace the genesis of many of the concerns that occupied Voegelin during a period in which the conception of his main work was undergoing frequent and perhaps fundamental changes.

**What Is a Girl Worth?** Dec 10 2020 Written by Rachael Denhollander, recipient of Sports Illustrated's Inspiration of the Year Award and one of Time's 100 Most Influential People (2018). Rachael Denhollander's voice was heard around the world when she spoke out to end the most shocking USA gymnastics scandal in history. The first victim to publicly accuse Larry Nassar, the former USA Gymnastics team doctor who sexually abused hundreds of young athletes, Rachael now reveals her full story for the first time. **What Is the Present?** Jun 03 2020 A provocative new look at concepts of the present, their connection to ideas about time, and their effect on literature, art, and culture The problem of the present—what it is and what it means—is one that has vexed generations of thinkers and artists. Because modernity places so much value on the present, many critics argue that people today spend far too much time in the here and now—but how can we tell without first knowing what the here and now actually is? What Is the Present? takes a provocative new look at this moment in time that remains a mystery even though it is always with us. Michael North tackles puzzles that have preoccupied philosophy, neuroscience, psychology, history, and aesthetic theory and examines the complex role of the present in painting, fiction, and film. He engages with a range of thinkers, from Aristotle and Augustine to William James and Henri Bergson. He draws illuminating examples from artists such as Fra Angelico and Richard McGuire, filmmakers like D. W. Griffith and Christopher Nolan, and novelists such as Elizabeth Bowen and Willa Cather. North offers a critical analysis of previous models of the present, from the experiential present to the historical period we call the contemporary. He argues that the present is not a cosmological or experiential fact but a metaphor, a figurative relationship with the whole of time. Presenting an entirely new conception of the temporal mystery Georg Lukács called the "unexplained instant," What Is the Present? explores how the arts have traditionally represented the present—and also how artists have offered radical alternatives to that tradition.

**What is Spiritism?** Jul 17 2021 A work that is still up-to-date, *What is Spiritism?* is useful for adherents of the Spiritist Doctrine as well as for those who want to understand the nature of Spiritism and its fundamental points. Kardec’s logic and common sense are obvious in this book as he confounds Spiritism’s detractors while answering the questions of those who believe in and aspire to a superior life. The book is divided into three chapters. The first is composed of dialogues between Kardec and a critic, a skeptic and a priest, providing answers to those who do not understand the basic principles of Spiritism. It also presents appropriate refutations to its opponents. The second chapter presents practical and experimental aspects of the science and is a kind of summary of *The Mediums’ Book*. The third chapter is a short synthesis of *The Spirits’ Book*, with solutions to psychological, moral and philosophical problems according to the Spiritist Doctrine. In addition, the book is prefaced with an abridged version of Henri Sausse’s biography of Allan Kardec.

**Start with Why** Dec 22 2021 The inspirational bestseller that ignited a movement and asked us to find our WHY Discover the book that is captivating millions on TikTok and that served as the basis for one of the most popular TED Talks of all time—with more than 56 million views and counting. Over a decade ago, Simon Sinek started a movement that inspired millions to demand purpose at work, to ask what was the WHY of their organization. Since then, millions have been touched by the power of his ideas, and these ideas remain as relevant and timely as ever. *START WITH WHY* asks (and answers) the questions: why are some people and organizations more innovative, more influential, and more profitable than others? Why do some command greater loyalty from customers and employees alike? Even among the successful, why are so few able to repeat their success over and over? People like Martin Luther King Jr., Steve Jobs, and the Wright Brothers had little in common, but they all started with WHY. They realized that people won’t truly buy into a product, service, movement, or idea until they understand the WHY behind

it. START WITH WHY shows that the leaders who have had the greatest influence in the world all think, act and communicate the same way—and it's the opposite of what everyone else does. Sinek calls this powerful idea The Golden Circle, and it provides a framework upon which organizations can be built, movements can be led, and people can be inspired. And it all starts with WHY.
