Television and the Embodied Viewer Sep 18 2021 Television and the Sensate Body in the Digital Age appraises the medium's capacity to evoke sensations and bodily feelings in the viewer. Presenting a fresh approach to television studies, the book examines the sensate force of onscreen bodies and illustrates how TV's multisensory appeal builds viewer empathy and animates meaning. The book draws extensively upon interpretive viewpoints in the humanities to shed light on a range of provocative television works, notably The Americans, Mad Men, Little Women: LA, and Six Feet Under, with emphasis on the dramatization of gender, disability, sex, childbearing, and death. Advocating a biocultural approach that takes into account the mind sciences, Cassidy argues that interpretive meanings, shaped within today's dynamic cultural matrix, are amplified by somatic experience. At a

time when questions of embodiment and affect are crossing disciplines, this book will appeal to scholars and students working in the fields of television, film, and media studies, both in the humanities and cognitive traditions.

The "People Power" Family Superbook: Book 13. Shopping Guide (Online Shopping, Product Reviews, Department Stores, Trade Shows, Closeout - Wholesale, Factory Outlets) Nov 08 2020 In my opinion, unless you're a total introvert, agoraphobic, disabled or too lazy to leave the house, your best bet to buy most things you need is locally. Go to the Yellow Pages, read your local newspapers, drive around the shopping areas, go to local free ad websites and talk to people you know about what you need. I generally buy most of my stuff from the big department stores but if I need something like furniture, I'll check out the furniture stores on the poor side of the town because the prices for the same goods are often much cheaper than a store in the higher class part of town plus you can often haggle with the owner on a cash deal. By shopping on the poor side of town at supermarkets for food, you can often save several dollars on a load of groceries. Beyond that, I generally go to the thrift stores a few times a year to buy t-shirts, clothes and anything else that strikes my fancy as I look around.

During the early years of television, Japanese of all backgrounds, from politicians to mothers, debated the effects on society. The public discourse surrounding the growth of television revealed its role in forming the identity of postwar Japan during the era of high-speed growth (1955-1973) that saw Japan transformed into an economic power and one of the world's top exporters of television programming.
