WILDLIFE BIOLOGY : AN INDIAN PERSPECTIVE Feb 23

2022 his book attempts to cover the whole gamut of wildlife in India portraying its different dimensions and conservation. Comprising thirteen chapters, the book is enriched with principles, theories, methods and tools of wildlife study, latest findings in Indian perspective including supportive data, and photographs of wildlife species in their natural habitat inclusive of colour plates. The chapters on 'Wildlife tools and techniques', 'Special wildlife management programmes' and 'Wildlife legislations and initiatives' will certainly attract special attention of the readers. The students who wish to pursue career in wildlife biology will be benefited with the book as it provides comprehensive understanding of the common field methods in wildlife research. The present text is a pioneer effort of the authors to fulfill the course requirement of undergraduate and postgraduate students of wildlife biology and zoology. The book will be equally valuable for the wildlife conservationists, academicians and those who are actively engaged in wildlife research.

KONARK - THE BLACK PAGODA Aug 27 2019 The sun temple of Konark in Orissa, also famous as the Black Pagoda, is undoubtedly one of the finest monuments of India. Insightful and interdisciplinary, this book considers the movement of people around the world and how contemporary artists contribute to our understanding of it. In this timely volume, artists and thinkers join in conversation around the topic of global migration, examining both its cultural impact and the culture of migration itself. Individual voices shed light on the societal transformations related to migration and its representation in 21st-century art, offering diverse points of entry into this massive phenomenon and its many manifestations. The featured artworks range from painting, sculpture, and photography to installation, video, and sound art, and their makers—including Isaac Julien, Richard Mosse, Reena Saini Kallat, Yinka Shonibare MBE, and Do Ho Suh, among many others—hail from around the world. Texts by experts in political science, Latin American studies, and human rights, as well as contemporary art, expand upon the political, economic, and social contexts of migration and its representation. The book also includes three conversations in which artists discuss the complexity of making work about migration. Amid worldwide tensions surrounding refugee crises and border security, this publication provides a nuanced

interpretation of the current cultural moment. Intertwining themes of memory, home, activism, and more, *When Home Won't Let You Stay* meditates on how art both shapes and is shaped by the public discourse on migration. *Amma Tell Me about Holi!* Jan 25 2022 The story behind the festival of Holi, as told by Amma to Klaka and Kiki.

Developed by experts on schizophrenia and exhaustively reviewed by APA members, the "American Psychiatric Association Practice Guideline for the Treatment of Patients With Schizophrenia" provides therapists with a set of patient care strategies that will aid their clinical decision making. The guideline describes the best and most appropriate treatments available to patients with schizophrenia, including psychopharmacological treatments, ECT, and psychosocial and community interventions. It delineates the process of treatment planning and identifies areas in which research may improve our understanding and management of this condition. This guideline will also help managed care organizations develop more scientifically based and clinically sensitive

criteria for the utilization and reimbursement of psychiatric services. Armed with these guidelines, clinicians can improve the care of their patients with schizophrenia and enable them to lead happier and more productive lives.

Tiger Warrior Sep 08 2020
Fateh Singh Rathore devoted the better part of his life to making Ranthambhore National Park a safe haven for the tiger population to live and grow in. He was intolerant of red tape and led a tireless crusade against poachers. Globally respected for his work, he was unpopular with Indian forest officials whenever he sought to point out anything that went wrong or the falling tiger numbers. In such cases, the official reaction was always denial—in other national parks such as Sariska or Panna, this kind of denial has led to a near wipeout of the entire tiger population. Fateh survived a bid on his life, fought stiff resistance from a powerful lobby of bureaucrats, and was even barred entry into his beloved national park, all because he would not give up his fight to save the tigers. Yet, against all odds, he remained an eminently upright man, admired by Rajiv Gandhi, Bill Clinton, Amitabh Bachchan, and wildlife activists like Valmik Thapar. Deeply loyal to his friends, Fateh remained an unconventional family man, a gifted amateur actor and a lover of the good life. Soonoo Taraporewala's insightful biography, based on her years

of association with this indomitable 'tiger warrior', not only brings alive Fateh Singh Rathore's extraordinary legacy but also opens up wider questions about wildlife conservation in India.

Indian Mammals Mar 15 2021 An invaluable reference and exceptionally usable guide to the mammals of India
Covering the rich diversity of mammal species in India, from tigers, elephants, rhinos and whales to primates, rodents and bats, *Indian Mammals* is a comprehensive, field-ready and illustrated guide. Accompanied by superb full-colour photographs, supplementary illustrations and distribution maps, and based on impeccable scientific research reviewed by experts, *Indian Mammals* records details of virtually every mammal known to exist in India. The in-depth, up-to-date text by Vivek Menon, one of India's leading naturalists and an authority on Indian wildlife, describes key identification features, biometrics, behaviour, social strategies, habitat and distribution. Encyclopaedic in sweep yet accessible in approach, *Indian Mammals* includes the majestic and most sought after as well as the extraordinary and elusive mammals. Passionate wildlife watchers will appreciate the range of coverage and tips on identifying mammals, while naturalists will value the exacting detail needed to distinguish similar species in the field. Planned for easy reference, this compact guide is the essential resource for wildlifers of any age, from

animal watchers and eco-tourists to active conservationists. ? More than 400 species of both land and water mammals with introductory pages on each order ? Over 1,000 carefully curated photographs ? Nearly 150 distribution maps ? Colour tabs for sections to facilitate ease of use ? The full index doubles up as a life-list ? Field notes reveal uncommon on-site experiences

[Teaching and Working with Children who Have Emotional and Behavioral Challenges](#) Oct 29 2019 This guidebook is designed to help educators and others in their efforts to work with students with emotional and behavioral difficulties (EBD). Chapter 1 provides an overview of the needs and problems presented by such students. Chapter 2 contains basic information to help provide an enhanced understanding of students with EBD. Causes of emotional and behavioral problems, the educators role in identifying and referring students, documenting behaviors, cultural differences, drug therapy, and getting support from others are discussed. Chapter 3 contains strategies for structuring curriculum and instruction so that they have the most positive impact possible on student performance. The following chapter offers tips and ideas for strengthening classroom management practices. It also describes techniques to help educators interact with students in a manner that creates a positive and supportive classroom

environment. Because of the success of instructional and classroom management programs can be enhanced by colleagues, families, and others, chapter 5 describes promising practices that many schools and districts now use to support classroom teachers and other instructional staff. The final chapter lists supplementary sources and contact information for relevant organizations.

Appendices include federal regulations on the discipline of students with EBD and a glossary. (CR)

Working the Night Shift May 29 2022 Relatively high wages and the opportunity to be part of an upscale, globalized work environment draw many in India to the call center industry. At the same time, night shift employment presents women, in particular, with new challenges alongside the opportunities. This book explores how beliefs about what constitutes "women's work" are evolving in response to globalization. *Working the Night Shift* is the first in-depth study of the transnational call center industry that is written from the point of view of women workers. It uncovers how call center employment affects their lives, mainly as it relates to the anxiety that Indian families and Indian

society have towards women going out at night, earning a good salary, and being exposed to western culture. This timely account illustrates the ironic and, at times, unsettling experiences of women who enter the spaces and places made accessible through call center work. Visit the author's website at

ECONOMIC ZOOLOGY. Dec 24 2021

The Divine Dance Aug 20 2021

The Trinity is supposed to be the central, foundational doctrine of our entire Christian belief system, yet we're often told that we shouldn't attempt to understand it because it is a 'mystery'. Should we presume to try to breach this mystery? If we could, how would it transform our relationship with God and renew our lives? The word Trinity is not found in the New Testament—it wasn't until the third century that early Christian father Tertullian coined it—but the idea of Father, Son, and Holy Spirit was present in Jesus' life and teachings and from the very beginning of the Christian experience. In the pages of this book, internationally recognized teacher Richard Rohr circles around this most paradoxical idea as he explores the nature of God—circling around being an apt metaphor for this mystery we're trying to apprehend. Early Christians who came to be known as the 'Desert Mothers and Fathers' applied the Greek verb perichoresis to the mystery of the Trinity. The best translation of this odd-sounding word is

dancing. Our word choreography comes from the same root. Although these early Christians gave us some highly conceptualized thinking on the life of the Trinity, the best they could say, again and again, was, Whatever is going on in God is a flow—it's like a dance. But God is not a dancer—He is the dance itself. That idea might sound novel, but it is about as traditional as you can get. God is the dance itself, and He invites you to be a part of that dance. Are you ready to join in?

How I Taught My Grandmother to Read and other Stories May 17 2021 These are just some of the questions you will find answered in this delightful collection of stories recounting real-life incidents from the life of Sudha Murty-teacher, social worker and bestselling writer. There is the engaging story about one of her students who frequently played truant from school. The account of how her mother's advice to save money came in handy when she wanted to help her husband start a software company, and the heart-warming tale of the promise she made-and fulfilled to her grandfather, to ensure that her little village library would always be well supplied with books. Funny, spirited and inspiring, each of these stories teaches a valuable lesson about the importance of doing what you believe is right and having the courage to realize your dreams.

Animals in Translation Jul 27

2019 With unique personal insight, experience, and hard science, *Animals in Translation* is the definitive,

groundbreaking work on animal behavior and psychology. Temple Grandin's professional training as an animal scientist and her history as a person with autism have given her a perspective like that of no other expert in the field of animal science. Grandin and coauthor Catherine Johnson present their powerful theory that autistic people can often think the way animals think—putting autistic people in the perfect position to translate “animal talk.” Exploring animal pain, fear, aggression, love, friendship, communication, learning, and even animal genius, Grandin is a faithful guide into their world. *Animals in Translation* reveals that animals are much smarter than anyone ever imagined, and Grandin, standing at the intersection of autism and animals, offers unparalleled observations and extraordinary ideas about both. **Expedition 196** Jun 25 2019 A memoir of Cassie's life leading up to, and during her Expedition around the world. At age twenty-seven, Cassie De Pecol accomplished something remarkable. She became the first woman on record to travel to every country on Earth, and did it faster than anyone in history, male or female. She was inspired by her experiences on the Discovery Channel's *Naked and Afraid* both the three weeks she spent in the Panamanian wilderness and the cyberbullying she endured after the show. And it opened her eyes to the need for women to make a difference in the world. In *Expedition 196*, Cassie shares the secrets

behind her personal triumphs and miraculous achievements. It's the story of a dreamer and a doer who went from restless college dropout to fearless adventurer to philanthropist and humanitarian activist dedicated to female empowerment and global sustainability. Thrilling, inspiring, and unforgettable, *Expedition 196* views the world through the eyes of one extraordinary young woman whose heart took her farther than most people can even imagine. [Faunal Heritage of Rajasthan, India](#) Jun 29 2022 This is the first ever monumental and scientific documentation of the faunal wealth of the Indian Desert state of Rajasthan. This volume, the first of two, provides background on Rajasthan and covers species diversity and distribution of fauna. A scholarly contribution to the field of knowledge, it provides novel and vital information on the vertebrate faunal heritage of India's largest state. Broadly falling under the Indo-Malaya Ecozone, the three major biomes of Rajasthan include deserts and xeric shrublands, tropical and subtropical dry broadleaf forests, and tropical and subtropical moist broadleaf forests. The corresponding ecoregions to the above biomes are, respectively, the Thar Desert and northwestern thorn scrub forests, the Khathiar-Gir dry deciduous forests, and the Upper Gangtic Plains moist deciduous forests. Contrary to popular belief, the well-known Thar or Great Indian Desert occupies only a part of the

state. Rajasthan is diagonally divided by the Aravalli mountain ranges into arid and semi-arid regions. The latter have a spectacular variety of highly diversified and unique yet fragile ecosystems comprising lush green fields, marshes, grasslands, rocky patches and hilly terrains, dense forests, the southern plateau, fresh water wetlands, and salt lakes. Apart from the floral richness, there is faunal abundance from fishes to mammals. In this volume, the various flagship and threatened species are described in the 24 chapters penned by top notch wildlife experts and academics. The world famous heronry, tiger reserves, wildlife sanctuaries and some threat-ridden biodiversity rich areas shall certainly draw the attention of readers from around the world. [Textbook Of Wildlife Management Text Book Library Edition](#) Nov 10 2020 **Looking Beyond Labels.. Becoming a Mindful Parent!!** Oct 10 2020 This book shares the 20 years of extensive and diverse experience of Reena Singh as an Occupational therapist working with neurodiverse children (children who learn differently) especially kids diagnosed with Autism, ADHD and sensory processing challenges. Reena shares the different approaches that are available and her view point on using and blending those approaches to make it holistic. She shares her insights with the reader on strategies that worked for her and which did not. She has tried to cover as

many frequently asked questions by parents and tried to answer them as per her understanding. She engages the reader on how her creative ideas and holistic approach helped families create lasting changes in the development of their children. She stresses on co-regulation - being mindful of our thoughts and responses as we parent and how that is more important as kids pick up on the adult's strategies to self-regulate. This book is a summation and distillation of life changing ideas and techniques that helped her see success stories in the families. It will help readers to connect to the essence of their children and will help them to bring the best out of their children for a happy and a healthy life at all levels. Also helps the reader to parent differently and make the experience more enriching. Reena is also an Advanced EFT practitioner, NLP practitioner, RMTi instructor, Touch for Health Proficient Practitioner and a Hypnotherapist. Her biggest qualification is that she is a parent and understands the challenges and joys of raising a child.
