Biblical Porn Mar 01 2020 *Between 1996 and 2014, Mark Driscoll's Mars Hill Church multiplied from its base in Seattle into fifteen facilities spread across five states with 13,000 attendees. When it closed, the church was beset by scandal, with former attendees testifying to spiritual abuse, emotional manipulation, and financial exploitation. In Biblical Porn Jessica Johnson examines how Mars Hill's congregants became entangled in processes of religious conviction. Johnson shows how they were affectively recruited into sexualized and militarized dynamics of power through the mobilization of what she calls "biblical porn"—the affective labor of communicating, promoting, and embodying Driscoll's teaching on biblical masculinity, femininity, and sexuality, which simultaneously worked as a marketing strategy, social imaginary, and biopolitical instrument. Johnson theorizes religious conviction as a social process through which Mars Hill's congregants circulated and amplified feelings of hope, joy, shame, and paranoia as affective value that the church capitalized on to grow at all costs.*

Free-Riders and Rent-Seekers Nov 28 2019 *In every country of Europe and America, there is a remarkable fraction of the adult population (sometimes near 50 per cent) whose needs are met with taxpayers' money. This situation is so common, and we are so used to it that nobody dares to propose an alternative. On the other hand, the State creates unproductive jobs for certain classes of people and makes itself the protector of specific sectors of the economy when companies risk insolvency. We are talking about the transfer of wealth from the people who create it to pure consumers of resources. The later ones we call free-riders. This book treats this matter in connection with the electoral process, the abusive stretching of well-established political concepts, the use of pseudoscience, and the alliance between free-riders and rent-seekers. For sure, it is doubtful that it will be possible to feed such a sizeable inactive population for a long time. However, the author abstains himself of any proposal for a change. His only aim is to explain how we arrived at the present situation and where the foundations of the current equilibrium stay.*

The Symbolic Scenarios of Islamism Aug 18 2021 *The Symbolic Scenarios of Islamism initiates a dialogue between the discourse of three of the most discussed figures in the history of the Sunni Islamic movement—Hasan al-Banna, Sayyid Qutb, and Osama bin Laden—and contemporary debates across religion and political theory, providing a crucial foundation upon which to situate current developments in world politics. Redressing the inefficiency of the terms in which the debate on Islam and Islamism is generally conducted, the book examines the role played by tradition, modernity, and transmodernity as major "symbolic scenarios" of Islamist discourses, highlighting the internal complexity and dynamism of Islamism. By uncovering forms of knowledge that have hitherto gone unnoticed or have been marginalised by traditional and dominant approaches to politics, accounting for central political ideas in non-Western sources and in the Global South, the book provides a unique contribution towards rethinking the nature of citizenship, antagonism, space, and frontiers required today. While offering valuable reading for scholars of Islamic studies, religious studies and politics, it provides a critical perspective for academics with an interest in discourse theory, post-colonial theory, political philosophy, and comparative political thought.*

Friending the Past May 15 2021 Can today's society, increasingly captivated by a constant flow of information, share a sense of history? How did our media-making forebears balance the tension between the present and the absent, the individual and the collective, the static and the dynamic—and how do our current digital networks disrupt these same balances? Can our social media, with its fleeting nature, even be considered social at all? In *Friending the Past*, Alan Liu proposes fresh answers to these innovative questions of connection. He explores how we can learn from the relationship between past societies whose media forms fostered a communal and self-aware sense of history—such as prehistorical oral societies with robust storytelling cultures, or the great print works of nineteenth-century historicism—and our own instantaneous present. He concludes with a surprising look at how the sense of history exemplified in today's JavaScript timelines compares to the temporality found in Romantic poetry. Interlaced among these inquiries, Liu shows how extensive "network archaeologies" can be constructed as novel ways of thinking about our affiliations with time and with each other. These conceptual architectures of period and age are also always media structures, scaffolded with the outlines of what we mean by history. Thinking about our own time, Liu wonders if the digital, networked future can sustain a similar sense of history.

Archives in a Changing Climate - Part I & Part II Aug 25 2019 This book contains the first and second volume papers from the 8th International Conference on the History of Records and Archives (I-CHORA 8). The Brink Dec 30 2019 "An informative and often enthralling book...in the appealing style of Tom Clancy" (Kirkus Reviews) about the 1983 war game that triggered a tense, brittle period of nuclear brinkmanship between the United States and the former Soviet Union. What happened in 1983 to make the Soviet Union so afraid of a potential nuclear strike from the United States that they sent mobile ICBMs (intercontinental ballistic missiles) into the field, placing them on a three-minute alert Marc Ambinder explains the anxious period between the United States and the Soviet Union from 1982 to 1984, with the "Able Archer '83" war game at the center of the tension. With astonishing and clarifying new details, he recounts the scary series of the close encounters that tested the limits of ordinary humans and powerful leaders alike. Ambinder provides a comprehensive and chilling account of the nuclear command and control process, from intelligence warnings to the composition of the nuclear codes themselves. And he affords glimpses into the secret world of a preemptive electronic attack that scared the Soviet Union into action. Ambinder's account reads like a thriller, recounting the spy-versus-spy games that kept both countries—and the world—in check. From geopolitics in Moscow and Washington, to sweat-soaked soldiers fighting in the trenches of the Cold War, to high-stakes war games across NATO and the Warsaw Pact. "Ambinder's account of a serious threat of global annihilation...is spellbinding...a masterpiece of recent history" (Publishers Weekly, starred review). *The Brink* serves as the definitive intelligence, nuclear, and national security history of one of the most precarious times in recent memory and "shows the consequences of nuclear buildups, sometimes-careless language, and nervous leaders. Now, more than ever, those consequences matter" (USA TODAY).

Decolonizing Methodologies Jul 05 2020 'A landmark in the process of decolonizing imperial Western knowledge.' Walter D. Mignolo, Duke University To the colonized, the term 'research' is conflated with European colonialism; the ways in which academic research has been implicated in the throes of imperialism remains a painful memory. This essential volume explores intersections of imperialism and research - specifically, the ways in which imperialism is embedded in disciplines of knowledge and tradition as 'regimes of truth.' Concepts such as 'discovery' and 'claiming' are discussed and an argument presented that the decolonization of research methods will help to reclaim control over indigenous ways of knowing and being. Now in its eagerly awaited second edition, this bestselling book has been substantially revised, with new case-studies and examples and important additions on new indigenous literature, the role of research in indigenous struggles for social justice, which brings this essential volume urgently up-to-date.

Media and Mass Atrocity Oct 20 2021 When human beings are at their worst – as they most certainly were in Rwanda during the 1994 genocide – the world needs the institutions of journalism and the media to be at their best. Sadly, in Rwanda, the media fell short. *Media and Mass Atrocity* revisits the case of Rwanda, but also examines how the nexus between media and mass atrocity has been shaped by the dramatic rise of social media. It has been twenty-five years since Rwanda slid into the abyss. The killings happened in broad daylight, but many of us turned away. A quarter century later, there is still much to learn about the relationship between the media and genocide, an issue laid bare by the Rwanda tragedy. *Media and Mass Atrocity* revisits the debate over the role of traditional news media in Rwanda, where, confronted by the horrors taking place, international news media, for the most part, turned away, and at times muddled the story when they did pay attention. Hate-media outlets in Rwanda played a role in laying the groundwork for genocide, and then actively encouraged the extermination campaign. The news media not only failed to fully grasp and communicate the genocide, but mostly overlooked the war crimes committed during the genocide and in its aftermath by the Rwandan Patriotic Front. The global media landscape has been transformed since Rwanda. We are now saturated with social media, generated as often as not by non-journalists. Mobile phones are everywhere. And in many quarters, the traditional news media business model continues to recede. Against that backdrop, it is more important than ever to examine the nexus between media and mass atrocity. The book includes an extensive section on the echoes of Rwanda, which looks at the cases of Darfur, the Central African Republic, Myanmar, and South Sudan, while the impact of social media as a new actor is examined through chapters on social media use by the Islamic State and in Syria and in other contexts across the developing world. It also looks at the aftermath of the genocide: the shifting narrative of the genocide itself, the evolving debate over the role and impact of hate media in Rwanda, the challenge of digitizing archival records of the genocide, and the fostering of free and independent media in atrocity's wake. The volume also probes how journalists themselves confront mass atrocity and examines the preventive function of media through the use of advanced digital technology as well as radio programming in the Lake Chad Basin and the Democratic Republic of Congo. *Media and Mass Atrocity* questions what the lessons of Rwanda mean now, in an age of communications so dramatically influenced by social media and the relative decline of traditional news media.

Five Feet Apart Jun 23 2019 Now a major motion picture starring Cole Sprouse and Haley Lu Richardson! Goodreads Choice Winner, Best Young Adult Fiction of 2019 In this #1 New York Times bestselling novel that's perfect for fans of John Green's *The Fault in Our Stars*, two teens fall in love with just one minor complication—they can't get within a few feet of each other without risking their lives. Can you love someone you can never touch? Stella Grant likes to be in control—even though her totally out of control lungs have sent her in and out of the hospital most of her life. At this point, what Stella needs to control most is keeping herself away from anyone or anything that might pass along an infection and jeopardize the possibility of a lung transplant. Six feet apart. No exceptions. The only thing Will Newman wants to be in control of is getting out of this hospital. He couldn't care less about his treatments, or a fancy new clinical drug trial. Soon, he'll turn eighteen and then he'll be able to unplug all these machines and actually go see the world, not just its hospitals. Will's exactly what Stella needs to stay away from. If he so much as breathes on Stella she could lose her spot on the transplant list. Either one of them could die. The only way to stay alive is to stay apart. But suddenly six feet doesn't feel like safety. It feels like punishment. What if they could steal back just a little bit of the space their broken lungs have stolen from them? Would five feet apart really be so dangerous if it stops their hearts from breaking too?
